AN EMPLOYEE OWNED COMPANY

Industrial Maintenance Technician

We're seeking a motivated, diligent, detail-driven professional to provide vital expertise in support of our facility and manufacturing equipment upkeep. In this position, you will be utilizing your knowledge and skills around electrical, mechanical, and facility maintenance while building a fulfilling career in the weld fastener industry.

Fasteners Industries is an Employee Owned Company, so we don't believe a job is just a job. As an owner, we see each role as a career and a way to advance your skills to not only better your life, but our community as well. If you enjoy hands-on work where you can make a direct impact to your company, this may be the opportunity for you!

Industrial Maintenance Technician Job Responsibilities:

- Must have the ability to complete repairs to equipment with minimal supervision.
- Fabricate or machine components that need repaired, replaced, or modified.
- Troubleshoot, maintain, and repair machinery/mechanical equipment.
- Utilize diagrams, schematics, sketches, operation manuals and manufacturer's specifications to maintain and properly fix machinery issues.
- Provide technical guidance for the preventative and predictive maintenance programs.
- Provide technical support to production personnel in a timely manner to reduce plant equipment downtime.
- Review, update and maintain equipment documentation.
- Communicate with engineering and production for project timelines and necessary resources to minimize downtime for repairs and upgrades.
- Actively take part in promoting continuous improvement of productivity and efficiency regarding maintenance items, machinery, and labor.
- Perform daily, monthly and yearly preventative maintenance

Most technicians work M-F 6:00 AM – 2:00 PM, but overtime can often be required due to unexpected maintenance issues. We have great medical and dental insurance which is paid by our company after full time status.

Industrial Maintenance Technician Qualifications and Skills

- Knowledge of various equipment (drills, saws, hand tools, electronics, welders) and a variety of maintenance equipment.
- High attention to detail and basic computer skills.
- Ability to take initiative in the problem-solving process.
- Ability to multi-task in fast paced production environment.
